CENTRAL PENNSYLVANIA CHAPTER
CONSTRUCTION SPECIFICATIONS INSTITUTE

JOINT SEALANT IN EXTERIOR WALLS

Presented by Jeffrey Erdly, Masonry Preservation Services, Inc.

Tuesday, November 10, 2009

We welcome Jeff Erdly for this education program on the proper design, specification, execution and inspection of elastomeric joint sealants in building envelopes. Jeff will discuss the various types of sealants available, joint configurations, related materials, how joint design works with other wall components, and some common misunderstandings and mistakes.

This program is registered with the AIA Continuing Education System for 1 LU HSW hour.

Jeffrey Erdly is the CEO and a co-founder of Masonry Preservation Services, Inc. in Bloomsburg, PA (www.masonrypreservation.com), for which he is responsible for initial investigation, pilot projects, analysis, and remediation recommendations on all projects. He is a nationally renowned authority on masonry preservation technology, frequently speaks to industry and professional

The Construction Specifications Institute is a nation-wide nonprofit technical organization dedicated to the advancement of construction technology through communications, education, research and service. Founded in 1948, CSI provides a forum for architects, engineers, specification writers, contractors, suppliers and others in the industry.

Anyone who is concerned with construction specifications in any manner is invited to apply for membership.

Don Scruggs,
CSI, CCCA
President

President's Message

This message is being written shortly after the Middle Atlantic Region Conference held in Charlottesville, Va., October 8th thru 11th. This was very good conference which featured a golf outing, two Keynote Speakers, many tours including UVA's Academic Village and South Lawn Project, and some very informative follow up technical sessions. Our Chapter was well represented with six members attending, three being Region Committee Chairs. The Chapter also received three Region Awards at the conference, one for the website, newsletter and education. Congratulations to Jeff Turicik (Website & Choice) and Rich Forsberg (Education) for a job well done!

We had very good turnout for our October Chapter meeting (37 people) which featured a program entitled "Photovoltaics For Everyone". This informative program provided a wealth of information about renewable energy systems (solar electric and wind turbines), system options, design parameters, basic system costs and pay-back timeframes. Our November program will be presentation on the history of flashings.

Also, mark your calendar for the next Region event, L.O.S. (Leadership Orientation Seminar) which is scheduled for April 16th & 17th, 2010. Please take note that this event will be held at the Radisson Penn Harris Hotel in Camp Hill, Pa.

See you at the next Chapter meeting on November 10.

Don Scruggs, CSI, CCCA
President

Logan Myers
Hospitality Chair

From the Chef's Table

MENU

*Sliced Roast Top Sirloin
Broiled Orange Roughy
Caesar Salad
Chef's selection of
Starch and Vegetable,
Chef's selection of dessert*

*Special Dietary menus,
such as vegetarian,
low fat or low sodium,
are available upon request.*

In addition, we will try to accommodate special requests such as vegetarian, low fat or low sodium selections. A fresh fruit plate, instead of the Chef's Dessert Selection, is always available by request. Special request menu reservations should be made no later than the Friday prior to the Tuesday meeting.

Please feel free to forward either your comments regarding your meal, or any suggestions that you feel could improve the CPC-CSI dinner, to: loganmyers@hotmail.com.

Curmudgeon's Corner

A rose is a rose...

by Sheldon Wolfe, RA, FCSI, CCS, CCCA

*"What's in a name? that which we call a rose
By any other name would smell as sweet"
~ William Shakespeare*

On your next Institute ballot you will be asked to vote on elimination of the Professional, Industry, and Associate Member categories. Other than a vague suggestion that the result "better reflects CSI's core value of building teamwork" - a questionable proposition in itself - I'm not sure what the justification will be, but I don't believe the benefits outweigh the cost. To put this issue in perspective, let's take a look at the history of

(Continued on page 4)

(Continued from page 1)

groups on masonry and façade inspections and repair technologies, and has written numerous papers and articles for the masonry restoration industry. Jeff is co-editor of two ASTM Special Technical Publications, STP-1314 "Water Leakage Through Building Facades" and STP-1444 "Building Façade Maintenance, Repair and Inspection.

In addition to a diverse background and on-going committee work with the American Society for Testing and Materials (ASTM), Jeff is professionally affiliated with the Sealant, Waterproofing & Restoration Institute, The Association for Preservation Technology, and the National Trust for Historic Preservation.

RESERVATIONS

to Logan Myers by calling (570) 850-6330 or e-mail at loganmyers@hotmail.com or use our on-line registration form at www.cpc-csi.org

YOU MUST MAKE RESERVATIONS OR CANCEL STANDING RESERVATIONS by NOON, FRIDAY, NOVEMBER 6, 2009.

ALL NO-SHOWS WILL BE BILLED.

Entrée selection should be made when making a reservation. First entrée listed is the default selection if no choice is made.

Attendees should make an entrée selection when reservations are placed.

(Please note that the first entrée listed will be the default selection if no choice is made.)

Minutes of Board of Directors Meeting

Attendees: Don Scruggs, John Groff, Jeff Snyder, Jeff Turicik, Jan Myers, Stu Cluck, John Morgan, Phil Frigm, Bill Brightbill, John Cannon, Charles Beauduy, Sid Myers, Scott Stefan, Larry Saylor, Chris Atwood, Christine Herbein, Rich Forsberg

Don Scruggs called to Order at 5:04 pm.

Approval of Minutes: It was noted that the 32 Registered for the Region Meeting was a total, not our Chapter's representation. Six (6) members of our Chapter attended. The minutes from the September Meeting were approved, as noted.

Treasurer's Report: Treasure Brightbill emailed copies of the Treasurer's Report to Board members. These were reviewed. The Audit is complete and paid for. The Audit and the Form 990 were available for review by Board members at the meeting.

Officer's Reports:

President-Elect: No Report

Vice President: John Groff noted that he has received the Flash Drive issued by National.

Secretary: No Report

Past President/Advisor: No Report

Committee Reports:

Academic Affairs: No Report

Advertising: No Report

Awards: Charlie Beaduy is the co-chair. Noted that an Awards Article was in Choice, thanks to Jeff. Jeff Snyder is seeking a new Awards Chair for next year. (They can join the committee now and work

thru the rest of the process so they are ready.)

Our Chapter received the following Awards for National: Electronic Communications – Chapter Award, Periodical – Chapter Award, Education – Rich Forsberg

Certification: Classes are being moved to Monday Night, same location.

Education: The September program was registered with AIA and obtained HSW & SD credit. October Program was submitted and received by AIA but had not yet been approved. (The new "streamlined" process seems to be taking longer.)

Electronics: New Technology, Display Ports (in lieu of VGA for screens now used.) Will require a License/Key for each station. There are many rapid changes in the various technologies at this time.

Exhibit Show: Mailings will go out to the Exhibitors November 1st. Will need a lot of promoting this year do to the economy. The Exhibit Show will be on Wednesday, March 17, 2009.

Programs: November's program will be on Joint Sealants. December will be a Tour of the PennDOT Testing Lab. (located near the Farm Show at the State Hospital Grounds) There is no reservation with the Radisson for December. (Possibly a Board Meeting after the Tour, maybe at the Appalachian Brewery??)

Publicity: Chris Atwood has volunteered to be the Publicity Chair.

Roster: In process. We currently have 127 members.

Technical: Looking for Articles!

Reminder: The Deadline for submissions to The Choice is the last week of the month.

Director's Reports:

Charlie Beaduy: Attended Region Conference. There were many seminars, as well as Hard Hat Tours and LEED seminars.

New Business:

Need to arrange December meeting location.

Next year's Region Conference will be Hosted by the Region. It will be held 9/23/10 thru 9/26/10 in Annapolis, MD.

Volunteers are needed to assist in setting the Conference up and with other details. Contact Mitch Miller to volunteer. (Chris Atwood is working on financing.)

LOS will be held April 15 & 16, 2010 in the Radisson, Campo Hill, PA.

Const5rcut 2010 will be held in Philadelphia, PA May 12-14, 2010.

Motion to adjourn was presented:

Motion by: John Morgan
Seconded by: John Groff

Motion to adjourn was unanimously passed.

*Respectfully submitted,
Rich Forsberg, CSI, CCCA*

*Rich Forsberg,
CSI, CCCA*

Curmudgeon's Corner

(Continued from page 2)

CSI member categories. (To make things easier, I will refer to these three member categories as “full members” to distinguish them from Intermediate Members and Student Members, who are not allowed to vote or hold elective office. And to avoid having to continually express this exception, I acknowledge that member categories are used when discussing the makeup of CSI boards of directors and committees.)

Today, CSI's original members would be considered Professional Members; they were specifiers who formed an organization to improve construction documents. There were no Industry, Associate, Intermediate, or Student Members. However, even though CSI's Certificate of Incorporation did not define any member categories, it anticipated the possible need for them and allowed their creation.

It isn't clear when CSI expanded its ranks to include Industry Members, but I think it's fair to say that for many years they were not treated as well as they should have been. According to a reliable source, it wasn't until 1966 that Industry Members were eligible for Fellowship; not until 1975 were members other than Professional Members allowed to vote; and it wasn't until 1988 that an Industry Member was voted in as president-elect.

When I became a member in 1987, virtually all of that was past history, a history I did not learn of for many years. When I submitted my membership application, I easily chose the appropriate member category; the fact that there were three categories of full members did not concern me. Later, when I became more active in my chapter, I saw the member categories as a convenience for achieving balanced representation on the board of directors, a balance I consider to be one of our strengths.

Although we do have member categories, all full members now have the same rights and responsibilities. In practice, there is no difference, and

there is nothing to suggest there is a difference. The terms Professional Member, Industry Member, and Associate Member do not appear on business cards, nor are they used in publications. After joining CSI, a member is a member is a member.

The only complaint I have heard about member categories came from a few Industry Members, who asked, “So we're not professional?” It was not the existence of member categories that disturbed them, but the titles. Not long after hearing that question, almost twenty years ago, I began referring to “industry professionals” and “design professionals”, a practice I continue today. Had our predecessors used these or similar terms, I doubt we would be having this discussion today.

When you vote, consider the following:

- CSI is one of only a few construction industry organizations that embrace everyone in the construction industry and give all full members equal rights and responsibilities. In contrast, others, such as AIA and NSPE, allow only specific members or groups to vote or hold office. Eliminating our member categories would have no practical effect on members.
- If there is value in our existing requirements for representation of different member types, the existing classification method is a benefit as it makes it easy to identify those who fit into the member categories. It's much easier to say “Associate Member” than “those members whose primary function is to provide service, support, and assistance to the construction industry” or list a long series of occupation codes. The same thing could be accomplished by other means, but to change would require a fair amount of administrative work to create and define new terms to replace the ones we now use, and to change all the policies and documents that mention member categories. In its simplest form, the result might merely be using lowercase names, e.g.,

“professional member” for “Professional Member.”

- Because member categories are not mentioned outside of membership forms and those policies that are related to makeup of boards and committees, there would be no visible change in CSI's general publications. Without a press release, few would know of the change, and fewer still would care about it.
- Although having a single member category for full members may more accurately reflect the way we feel about teamwork, does it affect membership? Have we lost or failed to attract any members who were offended by the member categories? If so, how many? If potential members are confused by the definitions of membership categories, perhaps a better explanation would eliminate the problem.
- This change would affect not only Institute bylaws. Region and chapter bylaws, as well as Institute, region, and chapter policies, operating guides, and documents would have to be reviewed for potential revisions.

I have no objection to a single member category, only to the effort required to implement it for the small impact it would have. If we had but a single member category, I would have the same objections to a change to multiple categories.

It may well be that there are compelling reasons to change to a single member category, reasons that make the work required to change bylaws, policies, and other documents worthwhile. If that is the case, we need to know what those reasons are well before the ballots are issued. It will be easy to say “yes”, but it will take a lot of time and effort to finish the job.

We have enough to do in addressing far more significant issues; we don't need to spend time on things that will have little effect.

Chapter Certification Study Course

(Article revised 11/3/09)

Chapter Certification Study Course

Two deadlines are fast approaching. January begins the Chapter Certification Study Course at the Midtown HACC Campus. Follow the instructions below to get enrolled in the program. It is highly recommended for anyone taking the exam. January 29th is the early deadline to register for the CDT, CCS, CCPR, and CCCA exams, so don't delay. February 26 is the final deadline.

This year CSI is running a special for anyone interested in taking the exam but is not a CSI member. They have a reduced price for the exam registration/ copy of the PRM (Project Resource Manual) / and CSI membership for one year. Please call or e-mail me for details. I have the special registration packets. This offer ends December 31, 2009.

The certification exams are scheduled for March 29 - April 3, 2010, and are available at Prometric testing locations throughout central Pennsylvania.

Study Course:

Dates: January 25 thru April 5, 2010
(Monday evenings for 10 weeks. March 8th is spring break).
Time: 5:30 to 8:30 P.M.
Location: HACC Midtown Campus, 4th and Reily Streets, Harrisburg, PA
Cost: \$140 (subject to change)
Registration: Refer to www.hacc.edu for registration requirements.
Textbook: CSI Project Resource Manual

The study course is designed to assist candidates preparing for the examination(s) by offering a complete overview of CSI's Project Resource Manual and the General Conditions publications by AIA (A201 or EJCDC 1910-8). The course will be offered as both a 1-credit course in HACC's Building Construction Technology curriculum and a non-credit course in HACC's continuing education program. Registration is available now.

To Register:

Go to www.HACC.edu and click Admissions.
Non-credit course enrollment: Course no. CRN 51939
Credit course enrollment: Course No. CRN 31281

If you need continuing education credits, the Certification Study Class offers CEUs, ECHs or LU credits. It's also a great way to brush up on your skills regarding contract document relationships, change orders procedures and formats, or the elusive contents of the AIA A201.

Having just returned from a CSI region conference in Virginia, it was interesting to hear other specification writers talk about how they started as a spec writer. Most had a mentor who worked with them to understand specs and did it because no one else wanted to. Do you see an opportunity in your firm to fill a void? Average age of a spec writer is about 55 years young.

If you have any questions about the class or the certification program feel free to contact me at 717-263-8464 or pbrunski@noelkerhull.com.

Invest in yourself! Get certified!

*Paul Brunski CCS, CSI
Chapter Certification Chairman*

Going Green!

KINETICS NOISE CONTROL NOW OFFERS MORE SUSTAINABLE PRODUCTS THROUGHOUT OUR ACOUSTICAL PRODUCT LINE WITH ECOSE® TECHNOLOGY BY KNAUF

All of our mid to high volume products using fiberglass board (6pcf) and lower density fiberglass (1- 3pcf) are being converted to this earth-friendly fiberglass.

Q - It looks different. How does it affect the acoustical performance?

A – The fiberglass is now a natural brown color which comes from ECOSE® Technology, a scientific breakthrough that allows these fiberglass based products to offer a level of sustainability never before achieved. Acoustical tests have proven that the fiberglass core materials used in Kinetics acoustical panels, baffles, and curtains will continue to produce the same high levels of sound absorption. This acoustical performance is based on the density and thickness of the fiberglass which has not changed.

Q – How does this technology help the environment?

A - While maintaining high acoustical performance, the ECOSE® Technology creates a much more sustainable binder for the fiberglass products. This binder technology converts rapidly renewable bio-based material into an inert polymer with superior bond strength and performance characteristics, while eliminating the non-renewable petroleum-based chemicals used in traditional fiberglass sheet and roll goods. This reduces the embodied energy in the binder by up to 70%, thereby reducing the carbon footprint of all products made with ECOSE® Technology. In addition the new binder contains no phenol, formaldehyde or acrylics that are used to make traditional fiberglass insulation binders. Kinetics Noise Control is the first acoustical product manufacturer to convert their fiberglass based product line to fiberglass manufactured with ECOSE® Technology. This fiberglass complies with all applicable health and safety standards and is GREENGUARD Children and Schools™ certified for VOC emissions.

Q – When will Kinetics convert to this unique fiberglass?

A – We anticipate that all mid to high production volume, fiberglass based products will be converted to the new technology for all shipments occurring after December 1, 2009. You will then see the addition of this new green-based technology as part of the on-line specifications for nearly all Kinetics' fiberglass based products.

Source: Kinetics Noise Control, Inc. · www.KineticsNoise.com

Obituary

Charles M. Stover, FCSI, Member Emeritus, AIA, SCIP, died on Oct. 8.

Stover was a member of CSI's District of Columbia Metropolitan Chapter. He also served on CSI's national Board as a Middle Atlantic Region Director in FY 2001, and on the Region Boundaries Task Team in FY 2003. Stover was elevated to Fellowship in CSI, one of the Institute's highest honors. He

received the honor in June 2002, 42 years to the month after joining CSI.

According to a notice posted by the Francis J. Collins Funeral Home, "As an architect, (Stover) worked on many District buildings, but most notably the historic renovations of The Willard and The Smithsonian Institute. And up until recently, he was a sought-after specification writer."

Honors & Awards

CSI's 2010 Honors & Awards Call for Nominations

The Construction Specifications Institute would like to welcome you to the 2010 CSI Honors & Awards Program!

CSI honors and awards recognize talent, achievements, and notable contributions to the construction industry that support the mission of CSI. There is much to look forward to this year as CSI continues to expand its awards program. This year a new award for Excellence in Construction Information has been added. An email featuring this award will be sent next week. In the meantime, please visit www.csinet.org/honorsandawards for details on this new award.

Although the January submission deadlines are still months away, there is every reason to start assembling your nomination packages now. Each week through November, Region and Chapter Awards Chairs and other officers will receive an email highlighting different awards. You are strongly encouraged to find members, colleagues, teams, and companies that are qualified candidates for Institute Honors and Awards. Also, remember that non-members are eligible for several awards including the Michelangelo Award and Honorary Membership.

Here are some key items to get you started:

1. Nomination Deadlines
January 2: Distinguished & Honorary Membership

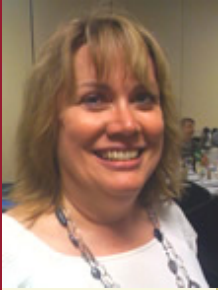

January 15: Fellowship and Institute Awards including the Michelangelo Award (Please note that submittals must arrive by 5pm Eastern on the deadline date.)

2. 2010 Honors & Awards Guide

The 2010 Honors & Awards Guide has been posted at www.csinet.org/honorsandawards. Please download and review the document as there have been some updates for 2010. Also available online are MS Word versions of the guide's submission forms. As always, it is important to use the latest forms when preparing submissions.

3. Fellowship Mentors Preparing a Fellowship nomination package? Consider consulting with a fellowship mentor. A list of mentors can be found at www.csinet.org/fellowship. This webpage also has a PowerPoint presentation, Demystifying Fellowship Nominations, that has practical tips for developing Fellowship nominations.

Should you have any questions about any of CSI's Honors & Awards, please email awards@csinet.org.

MARCH 17, 2010

11:00 A.M. - 6:00 P.M.

CAMP HILL RADISSON

1150 Camp Hill Bypass, Camp Hill, PA

Don't miss this chance to exhibit at Central Pennsylvania's Premier Exhibit Show attended by architects, engineers, contractors, facility managers and building owners.

The Show Committee will feature free food, wine, coffee, soda and cheese. Door prizes will be drawn hourly.

Complete and return the Reservation Form below to reserve your space for this exciting event. Check must accompany reservation form. Exhibit spaces (6 feet deep by 10 feet wide) are \$500 and will be provided with one table and two chairs, if desired. Spaces will be limited to 90 on a first-come, first-served basis.

The schedule is as follows:

Set-Up 6:00 A.M. until 11:00 A.M.
Show Time 11:00 A.M. – 6:00 P.M.
Down & Out 6:00 P.M. – 10:00 P.M.

Each exhibit space will be provided with a duplex receptacle with 110 volt power, if requested. (Please check the box on the Reservation Form if you will require 110 volt outlet.) NO POWER EXTENSION CORDS will be provided with the spaces. If required by you, please provide your own. Each exhibit space will be provided with a back drop and side drops.
