President's Message

First and foremost I'd like to remind everyone of our upcoming Product Show to be held Wednesday, March 9 at the Radisson Convention Center in Camp Hill. Stu Cluck and his band of volunteers have worked hard and put together a good show and some excellent seminars.

In recent months the board has had several inquiries by chapter members as to whether or not there is any help available for members experiencing financial pressures due to economic conditions. As a result we are considering several measures and hope to be able to provide some

form of support. CSI on the national level does have a program and I encourage anyone interested to contact Institute for details. They should also contact our chapter Membership chairperson Jan Myers for details of any local plans being developed.

A nominating committee has put together a slate of candidates for our upcoming chapter elections. This slate will be posted on the website shortly. Ballots will be sent out and the various methods of casting your vote will be explained on the ballot. The election will be held at our regular April meeting. I look forward to a good turnout. Remember, these candidates, once elected, will be responsible for carrying on the great tradition of service by the chapter for your benefit.

Last but by no means least, the region LOS is scheduled for April 1 and 2 in Gettysburg. This is another good opportunity to hone your leadership skills, network and learn more about what CSI can do for you.

I hope to see everyone at the Product Show and remember, there is no regular meeting in March.

President*

Construction Technology Award and Excellence In Construction Information Award

Construction Technology Award

Today's construction industry is driven not only by a stressed economy but also by technology. There is hardly a project in construction news that isn't receiving high acclaim for the use of technology in solving the design issues of a project. So isn't it ironic that with all this technology in our projects that two of CSI's most relevant awards for the 21st Century have seen few nominations in recent years.

The Construction Technology Award is presented to an individual, Chapter, Region or Group for:

- development of new materials, methods, technology, or project delivery systems or
- development or use of existing materials, methods, or technology in a new innovative manner

With all the new technology and products introduced every day, nominations for this award should be pouring in. The highly visible Building Information Management (BIM) technology alone has spawned many new construction technologies from software development to new ways of manufacturing materials. Any of these are potential award winning developments, but only if someone nominates them.

Excellence in Construction Information (EICI) Award

The EICI Award is a joint effort of CSI and Specifications Consultants in Independent Practice (SCIP). Its purpose is to recognize excellence, originality and creativity in processes, tools or documents used for the development or construction of the built environment. There are 3 separate categories: Project Documentation, Product Documentation and Innovation.

Project Documentation includes project conception documents, project delivery documents, design documents, or construction documents. They can include Preliminary Studies, Project Programs, Preliminary Project Descriptions, Outline Specifications, Entire Project Manuals, Individual Specification Divisions, Individual Specification Sections, Request for Proposals, Request for Qualifications or any document(s) related to a project or a

project delivery method. Nominations for this category are made using Form 501.

Product Documentation is limited to forms of construction product information and may recognize a manufacturer or an organization for their efforts. Submittals can be for a website, a Guide Specification, a database, or other methods of product information contributing to project development. Nominations for this category are made using Form 502.

Innovation is a catch-all category; one that encompasses documentation, processes, or information dissemination in a manner for which there is no established method. It is an attempt to award originality, uniqueness, creativity, and imagination as it applies to construction information. Nominations for this category are made using Form 503.

In all EICI categories, submittals themselves may be innovative. What the award is seeking to recognize is excellence in communication. And communication, as we are rapidly learning, takes many forms which are continually expanding and changing. No doubt your grandmother has a completely different definition for "tweet" than you do!

So what do you need to do now? As with all awards, you can do a quick check of the matrix in the front of the FY11 Honors & Awards Guide to view the award's basic submission requirements. Compile your list of potential nominees and contact your Region or Chapter Awards Chairman to determine who the best nominees are to submit for one of these prestigious technology awards. Then begin preparing the package by requested endorsement letters and completing the required forms. Starting these steps now will allow sufficient time to produce a well-documented nomination package.

If you would like more information on any of these awards, please review the Honors & Awards Guide at www.csinet.org/honorsandawards.

The only difference between Distinguished Membership and Honorary Membership is that membership in the Institute is a requirement for Distinguished Membership. Membership in the Institute is not a requirement for Honorary Membership.

Nominations for either Distinguished or Honorary Membership can be made by:

- A chapter using Honors & Awards Form 101 or Five voting CSI members Honors & Awards Form 102

Nominations shall include the statistical and supporting information listed on Honors & Awards Form 103. Letters of endorsement are also required. Distinguished and Honorary Members are elected by the Board.

The Michelangelo Award

Synonymous with the word "masterpiece" Michelangelo is recognized as one of the greatest artists of all time. The Michelangelo Award is one of CSI's most esteemed tributes, and it recognizes an individual for a lifetime of distinguished, innovative service to
