DORMA ARCHITECTURAL HARDWARE FACTORY TOUR & EDUCATION SEMINARS

Tuesday, April 10, 2012

We will visit the local factory of DORMA in Reamstown, PA. Bus transportation with refreshments will be provided and will depart from the Radisson Hotel, Camp Hill at 4:00 PM sharp. Attendees may also drive to DORMA, located at 100 Dorma Drive, Reamstown, PA 17567, about 2 miles off Turnpike Exit 286. Our schedule is as follows:

- 3:50 pm Convene at the Radisson
(upper parking lot across from McDonalds)
- 4:00 pm Depart the Radisson by Bus
with Education Seminar en route
- 5:00 pm Arrive at DORMA
Education Seminar / Chapter Board Meeting
- 6:00 pm Buffet Dinner, provided by DORMA
- 6:30 pm Plant Tour
- 7:30 pm Depart DORMA
with Education Seminar en route
- 8:30 pm Arrive at Radisson

Make your meeting reservation as usual through Logan Myers (loganmyers@hotmail.com) or on the chapter website (www.cpc-csi.org), by **Friday noon April 6**; PLEASE indicate if you plan to ride the bus or drive yourself to Reamstown.

Up to 4 CEUs (AIA 4 LUs, all satisfying Health, Safety & Welfare) can be earned by those who take the bus; for those that drive 2 CEUs are available. Subjects that will be presented with operating installations viewed are:

- **AUTOMATIC OPERATORS** - Sliding Doors, Swinging Doors, Telescoping Doors and the new innovation... "Magnetic Driven doors".
- **ALL-GLASS DOORS & WALL SYSTEMS** - frameless, tempered Glass Doors & Wall Systems.
- **ARCHITECTURAL HARDWARE** - Door Controls, Exit Devices, Locks, "Cloud based" Electronic Access Control Systems and more..... see why DORMA provides 24% of the world's Door Controls via a factory tour.
- **MODERNFOLD** - Operable Partitions, Moveable Glass Wall Systems and Accordion Doors.

**COME, LEARN & BE PAMPERED WHILE ENJOYING THE
CAMARADERIE OF YOUR FELLOW MEMBERS & GUESTS**

The Central Pennsylvania Chapter meets
the second Tuesday monthly
except NO meetings are held in July or August.

The Construction Specifications Institute is a nation-wide nonprofit technical organization dedicated to the advancement of construction technology through communications, education, research and service. Founded in 1948, CSI provides a forum for architects, engineers, specification writers, contractors, suppliers and others in the industry.

Anyone who is concerned with construction specifications in any manner is invited to apply for membership. Contact: Jan Myers
Ph: 717-238-4910.

PE, CSI, CCS
President*

President's Message

Spring has arrived early this year, and in my case, spring fever too. As I write this message, several Chapter members are attending the Middle Atlantic Region Conference (MARC) in Richmond, VA. They are too early to catch Garden Week in Virginia which is held every year in April, but I'm sure no one minds being out of the office with weather like we're having! Because I was unable to attend MARC Region Board Meeting this year, I asked Jan Myers, your Chapter's President Elect, to attend the Board meeting to represent our Chapter in my stead, and take advantage of the Leadership Orientation Seminar (LOS). This annual

event is not well known by the general Chapter membership, but it is an important mechanism by which ideas can be passed from Chapter to Chapter; is critical to provide face to face introductions and meetings of members from various parts of the Region. Our Region stretches from the Virginia border with North Carolina to the New York Border; and is a useful conduit from the Region to the Chapters and vice versa. Several other members of our Chapter hold Region offices too, including Charlie Beauduy, John Morgan, and Jeff Snyder.

*Jeff Turicik
Editor*

From the Editor's Desk

Attention all CSI Members!

This is your chance to be published have your voice heard. If you have written an article, related to the construction industry, send it to me! We are all good readers and can appreciate a good article. When you come to the next meeting, people will acknowledge you and maybe even buy you a drink! Try it and find out.

From the Chef's Table

Make your meeting reservation as usual.

PLEASE indicate your
"MENU" Choice

Ride The Bus

or

Drive Yourself to Reamstown

*Buffet Dinner
provided by DORMA*

In addition, we will try to accommodate special requests such as vegetarian, low fat or low sodium selections. A fresh fruit plate, instead of the Chef's Dessert Selection, is always available by request. Special request menu reservations should be made no later than the Friday prior to the Tuesday meeting.

Please feel free to forward either your comments regarding your meal, or any suggestions that you feel could improve the CPC-CSI dinner, to: loganmyers@hotmail.com.

*Logan Myers
Hospitality Chair*

RESERVATIONS

to Logan Myers by calling 570.850.6330 or e-mail at loganmyers@hotmail.com or use our on-line registration form at www.cpc-csi.org

YOU MUST MAKE RESERVATIONS OR CANCEL STANDING RESERVATIONS by **NOON, FRIDAY, April 6, 2012.**

ALL NO-SHOWS WILL BE BILLED. *Entrée selection should be made when making a reservation. First entrée listed is the default selection if no choice is made.*

To schedule a Table Top Display, email Bill Deck at wdeck@rlps.com or use the form in Choice or online.

Attendees should make an entrée selection when reservations are placed.

(Please note that the first entrée listed will be the default selection if no choice is made.)

The Central PA Chapter dues include all meals for the chapter program dinner meetings for the year. Come out to our meeting to network, socialize, and learn about timely subjects in the Construction Field.

Minutes of Board of Directors Meeting

Date: March 13, 2012

Meeting attendees: John Groff, Charlie Beauduy, Jeff Turicik, Jan Myers, Bill Brightbill, Jake Burkholder, and Chris Atwood, and Stu Cluck, and Larry Saylor.

Our meeting was brought to order by President Groff at 5:03 pm. We did not have a quarrum.

President Groff started the meeting with his report, and quickly the discussion went to the Exhibitors Show, which was the next day. The number of booths, food and traffic count were among the topics. There will be 2 free seminars as well as the main speaker on IBC changes for 2012. This is a 6 hour seminar.

The treasurers report was reviewed. The chapter is in good order here.

President Elect report: Eric Van Hardenbrook will be upcoming president elect, due to David Shaw moving to Virginia. Robert Lofton will be Vice president. The rest of President elect Myers officer slate is published in CHOICE.

Editors report: Editor Turicik reported that his position is transitioning to a web master based information reporter. Currently the reports, updates and programs are passed onto a Web master to report and update the CSI chapter web site.

Committee Reports:

Academic Affairs - No report

Advertising - No report

Archives - No report

Awards - No report

Budget - C Beauduy reported that there will be a budget meeting following this meeting.

By Laws - Bill Deck is the new By Laws chair, filling in for Dave Shaw

Certification - Class last night – no report

Education - Chair Lofton reported good attendance for the upcoming seminar at the trade show. A refund policy was discussed for people who pay for this seminar and then cannot make it for various reasons. New Policy to be attached to future seminar registration forms.

Electronics - no report

Exhibit Show - Chair Stu reported 59 exhibitors, 14 food sponsors, and 3 seminars.

Membership - Chair Myers reported there will be a BOGO (1/2 price) drive tomorrow at the show and 14 days thereafter

Programs - Chair Atwood reported that a Bus Trip to Dorma Controls will be the April program. April 10th - 3 AIA programs will be conducted on the bus to the factory in Reamstown, PA – Bus leaves the Radisson at 4 pm.

Publicity - no report

Roster - Chair Scruggs reports that a new roster will be done by July , 2012

Technical - Chair Morgan reports that Jake Burkholder will be his co chair

Directors - no reports – unanimous!

Old Business - The chapter is working on new policy for administrative guidelines, and policy.

Member Orientation is being held by President Elect Myers in May

The Region Conference – Chair Beauduy reports that a meeting is coming up at a future date sometime after the Show.

Support for Charities – On going

Social Event - There will be a meeting with Jan Myers, John Morgan, Jeff Turicik and Phil Frigm.

Guidelines for Speakers and Program presenters - Passed out by President Groff - nice job!

New Business:

Chapter Website – no action

Chapter Elections – President Elect Myers has worked out all of the time lines and processes for this to take place in June the 2012 meeting.

Refund Policy- Already discussed earlier in the meeting.

Meeting adjourned – move by Pres Groff, seconded by Pres elect Van Hardenbrook. 6:15 PM

Curmudgeon's Corner

What is a Master Builder?

The master mason was in charge. He was architect and builder rolled into one. He often directed a work force numbering into hundreds. But he also worked among his people. He cut stone and installed plumbing. That puzzles us, *wed as we are to the notion that academic and manual knowledge don't mix.* John H. Lienhard, *Professor Emeritus of Mechanical Engineering and History, University of Houston; my emphasis.*

architect: 1550s, from M.Fr. *architecte*, from L. *architectus*, from Gk. *arkhitekton* "master builder, director of works," from *arkhi-* "chief" + *tektion* "builder, carpenter". An O.E. word for it was *heahcræftiga* "high-crafter." *Online Etymology Dictionary.*

About 2,000 years ago, Roman military engineer and architect Marcus Vitruvius Pollio wrote *De architectura*, now commonly known as the *Ten Books on Architecture*. As I'm sure most readers will know, he said good design required three things - *firmitas, utilitas, venustas*, or strength, utility, and beauty.

We are less familiar with other things Vitruvius had to say about architecture. His first chapter discusses the profession of architecture and the education of the architect.

[Architecture] is the child of practice and theory. Practice is the continuous and regular exercise of employment where manual work is done with any necessary material according to the design of a drawing. Theory, on the other hand, is the ability to demonstrate and explain the productions of dexterity on the principles of proportion.

It follows, therefore, that architects who have aimed at acquiring manual skill without scholarship have never been able to reach a position of authority to correspond to their pains, while those who relied only upon theories and scholarship were obviously hunting the shadow, not the substance. But those who have a thorough knowledge of both, like men armed at all points, have the sooner attained their object and carried authority with them.

...Let him be educated, skilful with the pencil, instructed in geometry, know much history, have followed the philosophers with attention, understand music, have some knowledge of medicine, know the opinions of the jurists, and be acquainted with astronomy and the theory of the heavens.

Translation by Morris H. Morgan, PHD, LLD, professor, Harvard University.

The ten books address a wide range of other subjects: planning, civil engineering, pavement, plaster, flooring, painting, color, aqueducts, geometry, astronomy, drainage, water mills, hoisting, building technology in general, siege engines, and more. Given the extent of his knowledge, I think we can say Vitruvius was a master builder. He wasn't the first, nor was he

the last. As we will see, the profession of the master builder existed throughout much of history, until relatively recently.

How much of the education Vitruvius discusses is found in modern schools of architecture? The curriculum at my alma mater didn't match up too well with what he had in mind. I don't know what is offered at every school of architecture in the US, but I suspect they are similar. High school English, or perhaps another year in college seems to be enough for good writing. My college believed that sketching still lifes and nudes was more valuable than producing working drawings. Hard sciences were, well, too hard for architects, so we had only minimal requirements for math and physics, followed by engineering for dummies. We did have a brush with history, but only of the architectural variety, and that focused on the appearance of buildings rather than their function.

Many architecture schools spend years teaching planning and Big D design, give some attention to building systems and professional practice, and spurn construction experience as beneath the dignity of the architect. What did Vitruvius say? "...those who relied only upon theories and scholarship were obviously hunting the shadow, not the substance." To be a master builder requires knowledge of construction materials and how they are assembled.

I haven't been around long enough to say from personal experience, but from what I have heard and read, architects were respected people well into the twentieth century, when they still were thought of as "master builders". They knew a lot about the products they used and how they were to be installed, and they probably had hands-on construction experience. And when they visited the project site, the contractors feared the words, "Take it down and do it again - right!" or "Stop the work!"

Those days are gone. Today it's more common for the visiting architect to be ignored, sometimes sneered at. Owners don't trust architects as they did in the past; they now feel the need to hire construction managers, owner's representatives, and commissioning agents, each of whom assumes some of the architect's traditional responsibilities.

Architects have, over the last few decades, given up many of the services they formerly were expected to perform. This is partly due to the enormously increased complexity of construction and building systems - it is no longer possible for an architect to be familiar with all products - but there has also been a conscious effort to avoid responsibility, to just do the fun stuff. Many schools do not prepare future architects for their jobs; they do students a disservice by encouraging their belief that one day, they will be design architects. The reality is that few architects do *Design*, while the majority translate the design into drawings and specifications, or, more recently, a model.

Next month, we'll look at some of the things architects have given up.

How to List Initials After Your Name

Designation use is listed in CSI's Policy <http://www.csinet.org/Functional-Menu-Category/CSI-Leaders/Read-CSIs-Policy-PDF.pdf>, see page A4-30 to A4-31.

"g. Initials, titles, and honor designations shall follow a member's name in the following order:

1. Titles and parts of a name: Examples include Jr., Sr., Gov., Gen., or Col.
2. Not more than two designations not associated with CSI that the member is entitled to use: Examples include academic degrees (MA, MD, Ph.D.) and professional registration (CPA, LA, PE, RA).
3. Membership initials and honor designations bestowed by CSI. These are CSI (Construction Specifications Institute), FCSI (Fellow of the Construction Specifications Institute), Honorary Member, Distinguished Member, Lifetime Member, and Member Emeritus.
 - A. CSI shall not be used with FCSI.
 - B. Only one member title (Distinguished, Honorary, Lifetime, Emeritus) shall be used.
 - C. Initials designating accomplishment in CSI certification programs.
 - D. Examples are CDT (Certified Documents Technologist), CCS (Certified Construction Specifier), CCPR (Certified Construction Product Representative), and CCCA (Certified Construction Contract Administrator).
 - E. If individual has achieved one of the CSI certifications, CDT shall not be listed.
 - F. If individual has earned more than one CSI certification, all earned designations shall be listed in the following order: CCS, CCPR, CCCA.
4. Initials of other professional organizations (AIA, DHI, SCIP), certification granted by other organizations (RSW, AHC), and an honor granted by another organization (FAIA, FCSC)."

(Continued from page 2)

President's Message

The 2012 Exhibitors Show, the 37th annual show is history! This show, held each year at the Radisson Hotel and Convention Center in Camp Hill, provides significant financial support for our Chapter; and gives our local construction industry the chance to mingle, renew acquaintances, see the latest technology on display, and grab a bite to eat. Nearly 500 people and 58 exhibitors attended the event this year. The seminar explaining the changes between the 2012 International Building Code and the previous edition was very well attended and received. Larry Saylor, was at the start of it all 37 years ago, and stepped down from his leadership role as Exhibitors Show Committee Chair last year and handed the torch to Stu Cluck. I think we should all thank these gentlemen, and our many exhibitors, for the fine exhibition this year and the tradition embodied in this event. Not many Chapters have been able to initiate and sustain support for an event as successful and as looked forward to as our Exhibitors Show!

I have mentioned the importance of the changing communications environment to our industry and our Chapter in previous messages, and want to let you know the Board has set up an ad hoc committee to study consolidating several standing committees of our Chapter to allow us to more expeditiously and efficiently communicate with you.

The Publicity Committee, the Electronics/Communications Committee, the Editor of Choice, and the Long Range Planning Committee will be part of the reorganization effort. The expected result is much more nimble communication and response time.

The April meeting will be a tour of the DORMA hardware factory in Reamstown, PA; with free bus transportation leaving from the Radisson Hotel in Camp Hill at 4:00 to the factory. DORMA will present several free seminars offering AIA credits. See CHOICE for more details. Don't forget that the Institute's national convention CONSTRUCT 2012 will be held at the Phoenix Convention Center in Phoenix, AZ from September 11 to September 14, 2012.

*John Groff, PE, CSI, CCS
President*

(Continued from page 2)

Classified Ads

We seek:

Group Leader, Materials Support

- Develop new technology within asphalt blending, strategic qualification, fingerprinting, crude source mapping, asphalt modifications
- Conduct major R&D projects, focused on asphalt coating cost reduction, by improving conversion efficiency, identifying additives, and exploring new processing methodology
- Provide leadership and support in the identification and pursuit of novel applications and solutions
- 5+ years experience in the asphalt industry or industry relating to asphalt roofing, paving; prefer asphalt shingle experience is sought
- Master's degree in Chemistry, Chemical Engineering, Materials Science desired, PhD is a plus
- Salary range: \$80 - \$115K

Codes & Compliance Engineer, Northeast PA

- Manage product code qualifications and compliance (FM, UL, ASTM, Florida, Miami Dade, ICC)
- Understand and influence the development of business strategy
- Utilize product/application/market expertise to influence market decisions/direction and progress of industry codes & standards
- Immersed in industry trends to drive business segment objectives and initiatives
- Strong knowledge base of industry/market trends, direction and standards which guide new technology offerings
- BS degree in engineering/related science; prefer advanced degree
- 3-5 years experience in building/construction materials industry
- Excellent communications skills (oral and written)
- Salary range: \$90 - 110K plus profit sharing

Principal Scientist – Modified Asphalt Membranes & Systems, New Jersey

- Lead development of commercial asphalt/polymer waterproofing membrane products
- Direct formulation and application development of new products
- Identify and pursue major technical initiatives and novel new approaches to sustain competitive advantage
- Ability to manage multiple technicians, with two direct reports, supporting several, simultaneous research projects
- 7 - 10 years experience in polymer modified asphalts and/or waterproofing membrane development
- Master's degree in Organic Chemistry, Material Science, Polymer Science, or Colloid & Surface Science
- Salary range: \$100 - \$120K+

McCooe & Associates, with over 35 years of expertise in the specialty chemicals, allied products, and construction/building materials sectors, is a full-service, multi-disciplinary executive search firm.

Our client is a leading, global independent manufacturer of performance and specialty chemicals. The company manufactures over 100 products and offers an experienced and flexible custom manufacturing service.

We seek:

Sales & Technology Manager-Specialty Chemicals

- Significant experience in chemical process engineering; strong sales experience with proven success
- Rubber chemical experience is crucial; knowledge and experience with inks, powder coatings, personal care, leather, nano-materials, and custom manufacturing is desired
- Supervision of US custom manufacturers, including preparation/implementation of process transmittals
- Business development planning, including market research, competitive analysis, and spreadsheet preparation
- Develop product/market expertise to demonstrate product value to customers
- Participate/manage multi-disciplinary, global teams to commercialize company's specialty products
- Extensive travel required (up to 50%)
- Bachelor's degree in Chemistry or Chemical Engineering; advanced technical or business degree an asset
- Competitive salary, targeted at \$100K plus bonus and vehicle

CSI's 2012 Honors & Awards Call for Nominations

*Jeff Snyder
Awards Committee
Chair*

Welcome to the Construction Specifications Institute's 2012 Honors & Awards Program! CSI's Honors & Awards Program recognizes the talent, achievements, and notable contributions to the construction industry that support the mission of CSI. Participating in the Honors & Awards Program is a great way to let members and others in your community know they are appreciated and valued. So if your chapter hasn't participated in the Honors & Award Program in the past couple of years, this is the year to submit a nomination package!

With the tremendous success in uploading electronic submittals and endorsements last year, this process will continue again in FY12. If you didn't upload electronically last year, consider trying it this year. Not only will it save the cost of printing and mailing, you will also get immediate notification that your submittal was received so there is no guessing whether the package arrived on time.

The May 4th submission deadline sounds far off, but now is the time to start organizing and planning for the 2012 nominations. Begin by surveying chapter members and others in your community or region for those people, firms, and organizations that have made a difference in the construction industry and the mission of CSI. Then download the 2012 Honors & Awards Guide to determine the appropriate honor or awards category. The guide has a helpful matrix that makes the nomination process clear and straightforward.

To keep you informed about all the honors and awards, an email will be sent each week from now until the end of February to highlight the different awards and any applicable changes. Each chapter is strongly encouraged to develop a list of qualified candidates to submit for the numerous Institute Honors and Awards. Non-members are also eligible for several awards including (but not limited to) the Construction Technology Award, the Excellence in Construction Information (EICI) Award, the Environmental Stewardship, the Michelangelo Award, and Honorary Membership. Remember, the only way to guarantee someone doesn't win an award is to not submit a nomination package for them.

Some key items to note for this year's Honors & Awards Program:

1. Nomination Deadline: Friday, May 4, 2012 at 5pm ET
2. Newly Revised Honors & Awards Guide: The FY12 Honors & Awards Guide has been revised with some new forms and submittal requirements. Be sure to download the 2012 guide that is posted at www.csinet.org/awards. As always, it will be important to use the current forms when preparing any submissions.
3. Fellowship Mentoring: If your chapter is preparing a Fellowship nomination package, then consider consulting with a fellowship mentor. A list of mentors can be found at www.csinet.org/fellowship.

In the meantime, if you have any questions, please email awards@csinet.org.

2012 Honors & Awards Submission Deadline: May 4, 2012

www.csinet.org/honorsandawards

*Jeff Snyder
Awards Committee Chair*

Chapter Awards and Criteria

*Jeff Snyder
Awards Committee
Chair*

*Charlie Beauduy
Awards Committee
Co-Chair*

Chapter awards are presented at Chapter Awards meeting on June 12, 2012. The Awards Committee would like to receive nominations from the members for these awards. Please take the time to go through the following list, select one or more of your fellow members or organizations for a much-deserved award.

Chapter Certificate of Appreciation: Awarded to an individual who has rendered distinguished service to the Chapter in advancing the objectives of the Institute or the Chapter.

Chapter Organizational Certificate of Appreciation: Awarded to a firm or organization for distinguished accomplishments which promote the objectives of the Institute or the Chapter.

Chapter Cooperation Award: Awarded to a trade organization, traded union, contractor association, or professional association for exceptional liaison work with the Chapter.

Chapter President's Certificate: Awarded by the Chapter President, at the discretion of the President, for exceptional work performed on behalf of the Chapter.

Chapter Special Proficiency Award: Awarded to a professional member attaining special proficiency and outstanding stature as a practicing specification writer.

Chapter Citation: Awarded to an individual firm or organization for some outstanding accomplishment in specification writing.

Chapter Education Award: Awarded to an individual or organization that has made significant educational contribution in areas related to the purpose of the Institute or a significant contribution to the educational programs of the Chapter or the Institute.

Chapter Technical Award: Awarded to an individual, firm, or organization that has made a significant contribution to the

technical program of the Chapter or the Institute.

Special Awards: The Chapter President and the Board of the Chapter, at their sole discretion, may present any special awards as may promote the purpose of the Institute or the Chapter.

Chapter Craftsmanship Award: Awarded to an individual for superior craftsmanship, with the purpose of recognizing such outstanding craftsmanship in the construction industry within the Chapter's area.

The Rolf G. Loddengaard Award: Awarded to those members with 20 years of membership in CSI who continue to be active contributors to the Chapter and who best exemplify those ideals promoted and propagated by the late Rolf G. Loddengaard, FCSI, CCS.

Special Spouse's Award: Awarded to those members spouses who through their patience, understanding and devotion to their spouse, have contributed both to their spouses performance in behalf of the Chapter and to the principles of the Institute.

Academic Affairs Certificate of Appreciation: Awarded to an individual, firm, or organization for advancing the objectives of the chapter and the student affiliate. This award shall have no limit on the number to be presented each year and may be awarded to either a CSI member, firm, Trade association, organization or others who have shown a commitment to advancing the objectives of the Chapter and / or the student affiliate.

Leroy S. Kimmons Award: Awarded to a CSI member for distinguished service and exceptional support toward the student affiliate. Through his/her outstanding commitment, this recipient's effort has set forth a high standard in advancing the objectives of the student affiliate.

One award may be given each year to a CSI member who has shown a commitment in advancing the objectives of the student affiliate.

Please send nominations for the above awards as soon as possible to Jeff@wagmanmetal.com no later than April 30, 2012. Thank You.

*Jeff Snyder,
Awards Committee Chair*

*Charlie Beauduy
Awards Committee Co-Chair*

USGBC Central Pennsylvania Chapter: Lunch & Learn Event

Current Best Practices and Future Trends in Green Building

This discussion will focus on the building industry's current and future plans to reduce building energy use with a presentation of case studies for the regions highest performing buildings. Mark Purcell of IMC construction will be discussing new industry standards for buildings and what industry professionals will need to know to remain competitive in the green building market. Scott Kelly of Re:Vision Architecture will talk about a few of the regions greenest projects with an emphasis on LEED Platinum and net zero energy buildings. Attendees of this presentation will learn the why, what and how of high performing green buildings and will offer inspiration and guidance for both novices and experts.

Proudly Sponsored By Houck— Houck is a regional leader in construction services and property management.

They have installed numerous green roofs locally in the Central Pennsylvania region and continue to be a steward of the environment through their work.

Presenter Biographies:

Mark Purcell, AIA, CCM, LEED AP

Mr. Purcell is a Director at IMC Construction, a full service construction management, design-build, and general contracting firm headquartered in Malvern, PA that is ENR's highest ranked Green Builder in the Philadelphia area. He specializes in multi-million dollar construction projects for institutional, government, justice and higher-education clients with a focus on integrating sustainable design concepts into building programs. Mr. Purcell is an adjunct professor at Philadelphia University where he teaches construction law. He has also guest lectured at Drexel University's Westphal College, Villanova University's DiLella Center for Real Estate, and taught courses for the Associated Builders and Contractors. He is Past President and co-founder of the Delaware Valley Green Building Council and is a board member of the Philadelphia Center for Architecture. He is also former Chair of the Westtown Township Planning Commission, Chester County and is active in various other community and professional associations including the American Institute of Architects and National Peace Corps Association. He holds dual citizenship to the Republic of Ireland, is fluent in Spanish, and has traveled extensively living for extended periods of time in Ecuador, South America as well as Rome, Italy.

SCOTT KELLY, AIA, LEED AP|BD+C|ID+C|ND|O+M

Scott is co-founder and Principal of Re:Vision Architecture, a "deep green" architecture and sustainability consulting practice with offices in Philadelphia, PA and Berkeley, CA. Beginning his career with historic preservation and adaptive re-use projects, Scott became interested in the building elements and methods that cause buildings to endure and be more sustainable. Although Scott was an early adopter of the US Green Building Council's LEED benchmarking system, he continues to push the envelope of green building through "living building" and "zero -energy" projects.

In addition to practicing and teaching green architecture, Scott also consults to design firms, developers, building owners and manufacturers who are interested in green design charrettes, sustainable design, and green building rating systems such as LEED. In this role, Scott has guided dozens of LEED projects to successful completion, including projects at every level of LEED and using every available rating system. For his advocacy and design work, Scott was awarded the Philadelphia AIA's prestigious Young Architect Award, and his firm has received numerous awards, including the Cascadia Green Building Council Living Building Challenge Award, the Northeast Sustainable Energy Association's Zero-Net Energy Award and Awards of Excellence from the Society of American Registered Architects.

April 20, 2012

Calling All Reps!

Would you like to highlight your company or a special product? Do we have a deal for you. For a mere \$125-\$150 you can display your wares during the social time and have 10 minutes of everyone's attention during dessert at one of our CPC/CSI dinner meetings. What an awesome opportunity to hit several specifiers at once. If you are a member of this chapter, it will cost \$125. If you are not, it will cost \$150. For more details, see the CPC-CSI.org website. To schedule a table top, contact Bill Deck at wdeck@rlps.com. Thanks!
